

BUILDING A BETTER BOAT HOOK

Rubber Tip Cover

A screw-on soft rubber tip prevents scuffing and is removable for accessory attachment. Bright orange color provides easy in-the-water visibility.

Over-Molded Rubber Hook

Our boat hook features an over-molded soft rubber coating to protect your boat from scuffs and scratches.

4-Point Hook Attachment

The hook is attached at four points on the aluminum pole instead of the usual two on most competitive models for greater strength and durability.

Knurled Telescopic Grip

Each telescopic boat hook model features a knurled grip to allow for easier gripping and operation.

Buoyant Design

Sea-Dog boat hooks have been tested for buoyancy in both fresh water and salt water, and remain buoyant for over 5 minutes.

Marine Grade Aluminum Tubing

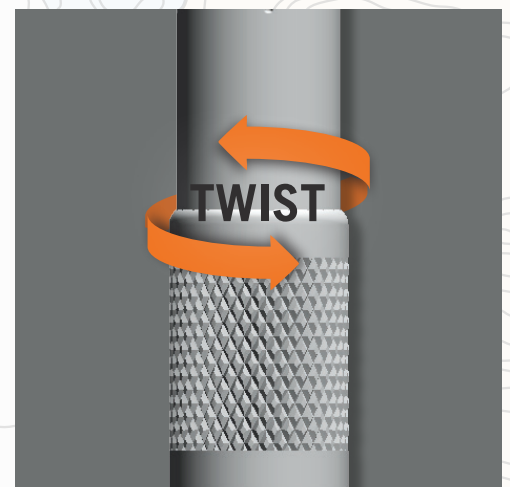

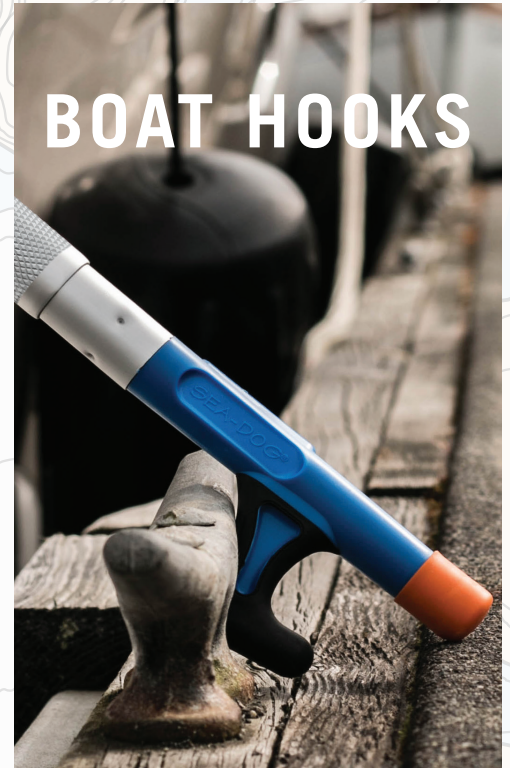

Every Sea-Dog boat hook is made from marine grade aluminum tubing, allowing for smooth and reliable operation over the life of the product.

Mooring Hook Platform

The boat hook features a pre-drilled platform area to install a mooring hook.

Comfort Grip Handle

The UV protected rubber handle provides a cushioned grip and comes with pliable hanging loop.

Size (in)	Pieces	Part #
48"	One	491012-1
72"	One	491013-1
24"-36"	Two	491021-1
48"-96"	Two	491024-1
36"-96"	Three	491034-1
